

Platte Chat

*An ongoing conversation about how to best preserve free enterprise,
personal responsibility and limited government in Nebraska*

The Platte Institute for Economic Research and Brad Luebben, UNL Department of Agricultural Economics and Eric Thompson, Director, UNL Bureau of Business Research today released the study: "The Nebraska Economy: The Potential Consequences of Proposed Climate Change Regulation."

This study takes an in-depth look at how Nebraska's overall economy would be impacted if proposed legislation takes place. The findings of in this study show a likely decrease in corn production in Nebraska as well as an overall loss of jobs and an increase in food prices.
