

NEBRASKA PROPERTY TAX POLLS 1-19-19

POLL METHODOLOGY

Results for these polls are based on automated telephone interviews conducted among a statewide sample of active likely voters. Data for this survey research was collected by Victory Geek for Cor Strategies.

Interviews were conducted via a computer-assisted telephone interviewing system utilizing techniques designed to achieve the highest possible respondent cooperation. The surveys were conducted from Monday, January 14th through Friday, January 18th. The margin of sampling error can be found in the below matrix. The margin of sampling error may be higher or lower for certain subgroups.

Sample Size and Margin of error:

- District 18: 275 ± 5.78%
- District 20: 352 ± 5.1%
- District 24: 394 ± 4.82%
- District 34: 407 ± 4.73%
- District 39: 255 ± 6.05%
- District 41: 621 ± 3.79%
- District 42: 400 ± 4.75%
- District 45: 273 ± 5.8%

Data is modeled in real-time as the interviews are conducted using our proprietary system, which determines interview targets based on weighted demographic information from the U.S. Census Bureau's Current Population Survey Voting and Registration Supplement. Data is sampled by using demographic information from current voting registration statistics as provided by the Nebraska Secretary of State to construct sample target weights.

The Platte Institute for Economic Research paid for all costs associated with this survey.
